Application/Control Number: 10/634,160

Art Unit: 1746

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Page 2

2. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Japan'843 (Japan 2001-355843) or Japan'919 (Japan 10-292919) in view of Japan'227 (Japan 1-205227).

Re claims 1-3, Japan'843 and Japan'919 are each cited disclosing a high frequency heating apparatus including a high frequency generating part (the magnetron of the microwave) for supplying a high frequency into a heating chamber for accommodating a food object to be heated and a steam generating part (16 in Japan'843 and 6 in Japan'919) for supplying steam into the heating chamber in which the high frequency generating part and the steam generating part supply at least any one of the high frequency and steam into the heating chamber to heat-treat the object to be heated, the high frequency heating apparatus comprising that differs from the claims only in the recitation of the cleaning mode. Japan'227 is cited disclosing in a microwave, a cleaning mode and the controls therefore. It therefore would have been obvious to one having ordinary skill in the art to modify the device of either Japan'843 and Japan'919, to including a cleaning mode as taught by Japan'227 for the purpose of removing any debris located within the microwave chamber. Re claims 4 and 6, note the water supply in Japan'227 and Japan'919. Re claim 5, note the fan in Japan'843. Re claim 7. although Japan'843, Japan'919 and Japan'227 are silent with regard to a pump, means

must obviously be provided to supply the water to the dish. Nonetheless to employ one means over another is deemed to be an obvious substitution of equivalents (see MPEP 2144.06 SUBSTITUTING EQUIVALENTS KNOWN FOR THE SAME PURPOSE). Re claim 8, to generate steam, it is the understanding that the water should be heated to at least 100°C at normal atmospheric pressure. Therefore the predetermined is believed to be inherent. Re claim 9, to include an additive for cleaning, it old and well known and to do so in Japan'227 would have been obvious. And the specific type is clearly dependent upon the article to be cleansed. Re claims 10-12, Japan'843 and Japan'919 disclose the food cooked by one of steam and the high frequency generating part'

Page 3

- 3. Applicant's arguments with respect to claims 1-12 have been considered but are most in view of the new ground(s) of rejection.
- 4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 10/634,160 Page 4

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to FRANKIE L. STINSON whose telephone number is (571) 272-1308. The examiner can normally be reached on M-F from 5:30 am to 2:00 pm and some Saturdays from approximately 5:30 am to 11:30 am.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr, can be reached on (571) 272-1700. The fax phone number for the organization where this application or proceeding is assigned is 571-272-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
